

Term Project 1

Topics:

1. Forward Chaining
2. Backward Chaining
3. Reasoning with Propositional Logic
4. Unification with Predicate Logic
5. Resolution with Predicate Logic

Instructions for reporting:

1. Strictly formatted
2. Clearly defined input
3. Major steps of processing
4. Accurate output
5. Implementation either in Prolog or in Python
6. Saved database (partial, as a sample) of intermediate activities
